

The Lomond Press

VOL. NO. 3

LOMOND, ALBERTA, FRIDAY, AUG. 20, 1920

\$1.00 PER YEAR.

Our Present Prospects Are---

Not being content with his unmeasurable destruction in May and June, the God of Wind returned his visit on Tuesday of this with all the fury of the former occasions. Any grain being ripe or near ripe and still uncut could not help but suffer to a considerable extent.

Cutting operations around Lomond are nearing the close. The fields that were spotted by the winds or the worms were a problem for the binder. Russian thistles and mustard were never so prolific as this year.

In some few cases wheat threshing has already started but it is by no means general as yet. The sample of grain is exceedingly good and the yield may be even better than was anticipated.

A good bit of winter rye has already been seeded and considerably more will be put in provided the heavens will open again and dampen things up. It is about four weeks now since we have seen rain water, and they have been four of the hottest, drying weeks we have ever stood up under. It was thought by some that the new moon would change things a bit. It did, but

it was only from heat to wind, then a couple of cool days and back to heat again. We have often wondered why they gave this province such a feminine name as Alberta. Now we are satisfied that it was because the climate is so changeable that one never knows when he has 'er to rights.

Talking about things in general, one should not slight friend potato and his chances for a bountiful harvest. The potato needs rain very badly to develop his waist line. Numerically he appears very frequently in each hill. In other parts of the country the potato crop is reported to be very abundant.

The wheat market is opening up much stronger than was anticipated by most people. Fort William prices are around \$2.70 per bushel. We may see three dollar wheat yet, and in that case Dad Damery's crop estimate will allow us to pay off more than two million dollars worth of our debts this fall.

And there will be sufficient feed in the district to carry the stock over the winter in good shape.

Taking everything else into account one wonders at the low prices quoted for beef cattle at the packing centers.

says that sugar will be down to fifteen cents a pound inside of three months. The people generally are not buying fruit and sugar this year at the prices asked. Cannons are taking more than usual on this account, anticipating a heavy demand.

Ireland has learned to eat oatmeal in larger quantities than ever before.

LOCALETS

J. H. Williamson and wife and family spent the week-end at Lake Newell in quest of brain food.

The telephone construction work is proceeding very rapidly and most of the poles are now set.

Mrs. H. E. Elves received a very pleasant surprise this week in an unannounced arrival of her mother, Mrs. Fergusson, of Smiths Falls, Ont., accompanied by her niece, Miss Holiday.

W. H. Smith is sawing up the sidewalk timbers with power from his tractor. The volunteer labor scheme appears to have fallen through and time labor has been set to work on the job.

W. H. Smith, I.H.C. agent, reports the delivery of fifteen binders for this year's harvest. Duke Armstrong sold all the Frost & Woods he could get delivery on, while Teskey put out the several Massey-Harris machines his company held in storage here.

Rev. Joseph Lee, pastor of Victoria Church, Calgary, occupied the pulpit in the Lomond Church on Sunday evening last. Rev. and Mrs. Lee had been visiting here, the guests of Mrs. Lee's brother, H. W. Burne.

W. Ainlay is selling of his farm implements, horses, and furniture on the S. W. Quarter of 18-16-19 half mile south and one mile east of Lomond at 2 o'clock on Monday Aug. 23.

A salmon equipped with two mouths, each with teeth, has been caught in the lower Columbia river and will be preserved and exhibited.

The world has lost 6,000,000 people through the influenza epidemic.

In the Philippines there are more than 300 women's clubs.

Nearly 1,000,000 women in Spain work in the fields as day laborers.

Money to Loan

---on improved farm property at the reasonable rate of 8 PER CENT.

We believe we represent the only mortgage companies that are willing to continue operations in this part of the country. These are old established and very substantial financial institutions. If they still retain confidence in the country, this is your opportunity to branch out.

Fight Down the Weeds

The cardinal point in farming at the present time is weed control. To kill the weed before the seed matures is all important. This work requires the use of efficient machinery. The Massey-Harris Company are undoubtedly specialists in building cultivation machinery. Study their theory of construction before buying.

W. A. Teskey - Lomond and Travers

No More Mange Restrictions

"Mange area abolished by order in-council passed yesterday. Condition in Alberta regarding shipment of cattle now identical with all other parts of Canada. F. Torrance, veterinary director-general," is the message that was received by W. F. Stevens, the secretary of the Stock Growers' Protective association, on Friday evening last, and there was joy among the cowmen wherever the information was made known to them. It requires thought and memory to realize just what such an announcement means to the beef producers of western Canada, southern Alberta in particular. It has been almost twenty years since it could be said that conditions throughout Alberta regarding the shipment of cattle were identical with all other parts of Canada.

Robt. Cant has gone to Vancouver on a business trip.

PROGRESS can only be assured by looking ahead and preparing for it.

Farmers—by exercising foresight in raising cattle, hogs and other readily saleable products—can add to their worth. This Bank aids and encourages every kind of agricultural operation.

AULTMAN-TAYLOR

**New
Century
Threshers**

**FOUR SIZES
All Standard**

**The Thresher That Sends
All The Grain Into The Bag**

MILLIONS of dollars are wasted in threshing each year in the form of grain which is fed into the separator but never reaches the bag—grain that works through to the stacker and is blown out with the straw. This is a necessary evil with the old vibrator type of thresher—but not with the Aultman-Taylor New Century.

The Aultman-Taylor New Century Thresher, equipped with the Universal Rotary Straw Rack device and Inclined Open Web, stop this loss. They thresh and save all the grain.

Universal Rotary Rack

The Universal Rotary Rack positively gets all the grain out of the straw. Its rotary action gives it double the agitation of the vibrating rack, hence double separating capacity. It moves the straw rearward in a continuous thin stream, insuring perfect separation and greater capacity. And at the same time, it saves power and stops vibration.

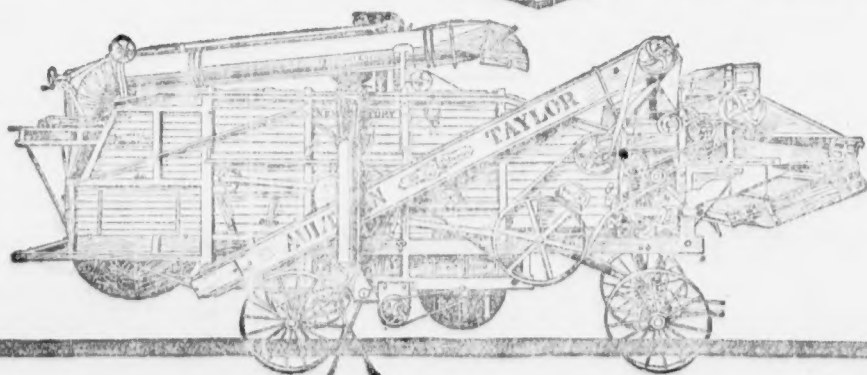

Four Sizes—All Standard

Aultman-Taylor Threshers are made in four sizes, all absolutely standard in design and construction. The sole difference between the largest and smallest New Century Thresher is one of size only. Our two smaller threshers are the ideal size for individual use with the small tractor.

We will be glad to give you any further information along this line at any time. Come in and talk it over with us now.

NOTES

One of the irrigation canvassers is reported to have met with refusal on the part of one individual in that "irrigation" would literally mean a slap in the face to Providence."

If there is one thing more than another that we respect in this world it is a man's reverence for God, The Almighty, The Supreme Being, Providence or that by which any term is used to designate the maker of destiny or the basis of principles upon which is founded religious worship. Nevertheless we accept this excuse in relation to irrigation as something too narrow minded to be taken seriously. The lack of rainfall is nothing particularly new to Southern Alberta. Long before settlement was made here by homesteaders there were the years of drought to contend with, but they affected so few people that no one heard anything much about them. Before the years of settlement it was established that it was possible to raise phenomenal crops here when there was sufficient moisture, and indeed the country passed through a long period of years without suffering seriously from lack of rain. It is said that from 1896 to 1910 there was really not a dry year. They have been unfortunately frequent since. Admitting that this country, climatically, is as it was shaped by the Almighty, could not it have been included in the plan of the Almighty to have this area irrigated? There are abundant waters coming from the mountains to the west and their flood time is at the very season when man could utilize the moisture to the best advantage to assist him in making mother earth produce a bountiful harvest. When it comes down to argument or debate irrigation stands a good chance to be included into the interpretation of a divine plan.

Did not great areas of the country in which Christ travelled and preached when on earth require to be irrigated? There is no record of him having said anything against it. Did not the inhabitants of Egypt depend upon natural irrigation

from the river Nile for centuries, and does not the great As-suan dam not relieve them from all fear of drought or inundation and make the country a much more safer place for the inhabitants to live.

You cannot slap the Almighty by making use of any natural elements found upon the face of the earth to provide a means of subsistence for his people.

God directed the Children of Israel in the Land of Canaan, a land flowing with milk and honey. But the Israelites had the care for the cows to get the milk, likewise the bees for the honey.

Fair Average Crops

Mr. Gilchrist of Winnipeg, head of the Home Grain Co., paid a visit to the Lomond house this week and expressed his opinion that the Lomond crops were about on a par with the average in Western Canada this year.

Imperial Polarine Available Everywhere

WHEREVER you tour, throughout the length and breadth of Canada, you can secure the grade of Imperial Polarine you now use for lubrication—exactly the same uniform grades are sold by dealers everywhere from Halifax to Vancouver.

Imperial Polarine reduces your greatest expense—depreciation, yet costs less than storage, tires, repairs or gasoline. It reduces friction to a minimum, maintains a piston-tight seal under heaviest engine heat, helps the engine extract the last ounce of power out of gasoline.

Imperial Polarine holds its body, maintains compression—keeps the motor running smoothly and quietly. The Imperial Chart of Recommendations shows the grade recommended for your car. Ask to see it when you stop for oil.

Imperial Polarine is sold by good dealers everywhere in sealed one-gallon and four-gallon cans, half-barrels and barrels, also in 12½-gallon steel kegs, the handy size for the home garage. Buy the larger sizes to save money.

LOMOND

We Must Protect the Birds

Do we appreciate our birds?

The west is threatened with a grasshopper plague, while in the east the caterpillar is causing havoc among the trees.

Man, by his insatiable slaughter of the birds, has so reduced the balance of nature that the destructive insects are getting the upper hand. Dr. Tolmie, Minister of Agriculture, in introducing his estimates in the House of Commons on May 24, stated that Canada's annual loss from parasites amounted to \$125,000,000, and that in preparation for the expected grasshopper plague alone, there had been purchased 100,000 lbs of arsenic, 2,000 tons of bran and 50,000 gallons of molasses from which to make poisoned bait.

To overcome, or at least to minimize the caterpillar plague, various methods of attack are being adopted, chiefly that of spraying.

Recently, a woodpecker was noticed at work upon a tree which was being defoliated by caterpillars. With the aid of binoculars, it was found that, in one visit to the tree, it secured twenty four caterpillars. This bird, or another returned at about quarter-hour intervals each time disposing of a number of caterpillars.

Birds are the natural enemies of insects and bugs and, without them, we could not successfully combat the pests which destroy our food supplies.

By protecting the birds, we protect ourselves.

Ernie Lane cut 220 tons of alfalfa off one hundred acres on the Lane farm on the Bow River at Bow City.
